

ISO 9001 Certified Company

ABOUT US

When you choose CRK PathLabs as your expert in diagnostic services, you can expect cutting-edge state-of-the-art lab facilities, at home sample collection facilities as well as digital reports at your disposal. CRK PathLabs offers a comprehensive menu of pathology, radiology and cardiology tests along with value-added services such as Drive Through Covid testing, Full body check-ups and other specialised healthcare packages.

Our sprawling 3200 sqft diagnostic centre at a convenient location in Hajipur is easily accessible with ample parking facilities. Moreover, our centre has a well-trained team of experienced specialists which allows us to deliver world-class diagnostic and pathology services at the earliest.

ACCREDITATION

We are in the process of becoming one of the few diagnostic service providers in the state of Bihar to be accredited by NABL. National Accreditation Board for Testing and Calibration Laboratories (NABL) accreditation ensure that labs follow the stringent quality protocols set up by this body. This, in turn, ensures control over man, machine, environment and processes.

SERVICES TO BE PROVIDED

- Full Covid diagnostic solutions and Molecular diagnostics
- Comprehensive and multidisciplinary pathology services
- Immunology, Radiology, Biochemistry, Haematology, etc.
- Health check-up packages
- Corporate healthcare services

OUR VISION

- To inspire people to "Live Healthy"
- To provide "superior quality" diagnostic services at cost effective prices
- To imbibe precision, constant improvement and better practices with compassion and sensitivity

OUR MISSION

- To be one of the most admired diagnostic companies in the state of Bihar
- To build confidence in the medical community and the public
- To deliver a great patient experience by ensuring convenience, care and fast turnaround time

OUR VALUES

- Genuine care, empathy, enthusiasm and great interrelationships
- Don't settle and lead by example- innovate and evolve
- Diligence, Attention to detail, and minimal error
- Transparency and cost-effective prices

OUR MOTTO AND MANTRA

"We Care for Your Health"

As an organisation, our main objective is to encourage regular proactive healthcare check-ups for every individual and promote preventive healthcare in order to reduce the burden that disease puts on your health.

Don't do a test after you fall ill, do a test not to fall ill. That's our Mantra.

POPULAR DIAGNOSTIC TESTS

PATHOLOGY

- Glucose Fasting (FBS), Sodium Fluoride Plasma
- Complete Blood Picture (CBP), EDTA Whole Blood
- Lipid Profile, Serum
- Creatinine, Serum
- Thyroid Profile (T3,T4,TSH), Serum
- Glycosylated Hemoglobin (HbA1C), EDTA Whole Blood
- Vitamin B12 (Cyanocobalamin), Serum
- 25 - Hydroxy Vitamin D, Serum
- Culture And Sensitivity, Urine (4 parameters)
- Thyroid Stimulating Hormone (TSH) Ultrasensitive, Serum
- Complete Urine Examination (CUE), Urine
- Liver Function Test (LFT), Serum
- Blood Grouping ABO & Rh Typing, EDTA Whole Blood
- Dengue (IgG & IgM), Serum
- Dengue Antigen (Ns1) Rapid, Serum
- C-Reactive Protein (CRP), Serum
- Widal (Slide Method), Serum
- Total IgE, Serum
- 1, 25-Dihydroxy Vitamin D, Serum

RADIOLOGY

- X-Ray Chest PA View
- X-Ray PNS
- X-Ray Lumbar Spine AP/LAT
- X-Ray Both Knee AP/LAT (Standing)
- Ultrasound Whole Abdomen
- Ultrasound Antenatal
- Ultrasound Tiffa
- **UPCOMING RADIOLOGY TESTS**
- Doppler Peripheral Bilateral (Venous)
- Doppler Peripheral Bilateral (Aterial)
- CT Brain Plain
- CT Orbit
- CT Chest
- CT 3D Study
- CT Whole Abdomen With Contrast
- CT M.R.C.P
- MRI Brain Plain
- MRI Cervical Spine
- MRI Lumbar Spine
- MRI Right Knee Joint
- MRI Cardiac (with contrast)

INFECTIOUS DISEASES PROFILES

- **COVID Monitoring Profile**
 - 1 (Ferritin, CRP, D-Dimer, Inter Leukin 6 (IL-6))
- **Electrolytes, LFT, Creatinine, CBP, LDH)**
- **COVID Monitoring Profile**
 - 2 (Ferritin, CRP, D-Dimer, Electrolytes, LFT, Creatinine, CBP, LDH)
- **COVID Recovery Profile**
 - Complete Blood Picture (CBP)
 - EDTA Whole Blood
 - Lactate Dehydrogenase (LDH) Serum
 - Liver Function Test (LFT) Serum
 - Glycosylated Hemoglobin (HbA1C)
 - EDTA Whole Blood C-Reactive Protein (CRP) Serum
 - Ferritin, Serum 25 - Hydroxy Vitamin D
 - Creatinine Serum
 - D Dimer Quantitative Sodium Citrate Plasma
 - SARS-CoV-2 S IgG Antibody - Quantitative, Serum)
- **Antibody Detection Test for COVID-19 : A Simple Blood Test to know if you had a COVID-19 infection in the recent past.**

- **Dengue Profile:** (CBC (Complete Blood Count), Dengue Serology (Ig M & Ig G), SGOT - Aspartate Amino Transferase, SGPT - Alanine Amino Transferase)
- **Chikungunya Profile:** (CBC (Complete Blood Count), Chikungunya PCR, SGOT - Aspartate Amino Transferase, SGPT - Alanine Amino Transferase)
- **Tuberculosis Profile:** (AFB Culture, AFB Stain, PCR For Tuberculosis)
- More to come...

COMPONENTS OF THE PACKAGES

- **Healthcare check-up package**
- **Full body check-up package Male**
- **Full body check-up package Female**
- **Healthy Heart package**
- **Senior Citizen Male**
- **Senior Citizen Female**
- **Full Diabetes package**
- **Arthritis (Bone & Joint) Minor package**
- **Arthritis (Bone & Joint) Major package**
- **Basic Fertility check-up for women**
- **Basic Fertility check-up for Men**
- **Cancer screening male**
- **Cancer screening female**
- **As requested by Employers /customers: list**
- **Annual Check-ups**
- **Corporate Wellness Programs**
- **Pre-employment check-ups**
- **Preoperative Check-ups**

VALUE ADDED SERVICES

- **Home sample collection service:** On receiving a request through our Website, App or call, a trained technician arrives at the doorstep of the patient to collect samples. Home collection is completely free of cost on 1st visit.
- **Simplified registration service-** easy online registration and appointment system
- **Minimum possible waiting time-** Majority of the reports are available within a few hours. We understand the importance of fast delivery of health reports and we deliver just that.
- **New age mobile/online/paperless reporting-** reports can be sent to your phone via sms/email/whatsapp or can be collected at any of our centers.
- **Ease of payment-** we accept all credit/debit card/mobile or digital like google pay+ payment. There are also provisions for Third party or insured patients.
- **Ambiance -** Cleanliness and hygiene is maintained at all times, AC waiting lounge, potable drinking water, washroom facility, parking facility
- **Empathy -** female attendant to handle female patients, special provisions and facilities like ramps and lifts for differently abled patients; prompt customer support
- **Social Media presence -** Fb/ twitter/ Linkedin/ Blogs to reach out to more and more customers and vice versa
- **Digital records of all reports upto 12 months.**
Smart reporting with graphical comparison with previous results
- **Comprehensive family coverage upto 4 members.**

IT AND LOGISTICS

- We understand the crucial link between sample collection and report delivery, and hence, we have built a strong logistics unit that offers seamless execution.
- We transport samples under strict temperature control norms using certified packaging to ensure sample integrity.

ADVANCED DATA MANAGEMENT SYSTEM

- CRK PathLabs relies on latest technologies and uses world class products like CRM to help serve its customers better, which is integrated with our core Lab Information Management System.
- Our interactive portal, which is a customer log-in based secured system offers exhaustive features for accessing their Web Reports online, Centre Locator, Book an appointment, Video Conferencing with our Pathologist and online access to their historical reports.
- Suburban offers SMS & Whatsapp facility to customers for Lab Test Results and auto-email of reports to their registered email addresses.
- At CRK PathLabs we believe in innovation and adoption of latest technology to help serve our customers better.

PATHOLOGY

At CRK PathLabs, we pride ourselves on providing quality services for the prevention and accurate detection of diseases. The latest technology, sophisticated equipment and stringent quality measures let us do this consistently. Under our roofs, patients will find the full spectrum of services from routine CBP and Blood Glucose tests to highly specialised investigations for infectious diseases, cancer markers, hormonal assays and more. Each discipline is headed by reputed and experienced medical professionals supported by teams of rigorously trained technologists.

LCMS

LCMS is a speciality division of biochemistry which deals with the quantitative analysis of proteins in blood and urine samples. This technique has numerous applications including newborn screening for various treatable disorders, quantification of drugs and vitamins.

IMMUNOLOGY

Immunology tests deal with the detection of antigen and antibodies present in the blood in response to a particular pathogen. These tests are used in infectious diseases, cancers, organ transplantation, and autoimmune disorders.

CLINICAL BIOCHEMISTRY

Clinical biochemistry deals with the measurement of analytes, which aims to diagnose and monitor various diseases. This department includes a large number of diagnostic tests that help understand pathogenesis and etiology of different diseases. It is essential for early diagnosis of a disease and also assessment of its therapy efficacy.

HEMATOLOGY

This division of pathology deals with estimation of cell counts and study of cell morphology to diagnose various blood disorders ranging from simple infections to cancers. Bone marrow studies bleeding disorder tests and tests related to blood genetic disorders are also performed here using some advanced techniques like flow cytometry and HPLC etc.

CLINICAL PATHOLOGY

This division of pathology deals with study of various body fluids like urine, CSF, ascitic fluid, synovial fluid, pleural fluid etc. The quantitative estimation of cell counts helps in the presumptive diagnosis of various conditions thus helping in the differentiation of infectious from non infectious and malignant causes.

CYTOGENETICS

This department deals with the tests related to detect the structural and numerical abnormalities in the chromosomes responsible for various disorders. These tests are used to diagnose a few cancers and genetic disorders.

MICROBIOLOGY

This department deals with tests to detect microbes like the bacteria, virus and fungi. Different manual and automated techniques are used to identify the organisms present in blood and body fluid. The antibiotic sensitivity pattern to that particular organism can be obtained for appropriate treatment.

MOLECULAR PATHOLOGY

This department deals with the DNA and RNA based tests for particular genes present in blood, body fluid and tissue. These molecular techniques are used to diagnose and monitor some infectious disease, cancers etc.

CYTOPATHOLOGY

This is a diagnostic division of pathology that deals with study of cellular elements obtained by minimal invasive procedures like fine needle aspiration of palpable superficial swellings and other studies include morphological study of cells collected using a cyto brush. PAP smear test is the best example. These procedures are quick, efficient and a non-traumatic way of detecting cancers and aid in differentiating from non cancers.

HISTOPATHOLOGY

This division of pathology deals with study of surgically excised tissue involving microscopic examination using routine and special stains. Ancillary tests like immunohistochemistry, Frozen sections, Immunofluorescence are also used for precise diagnosis. Services of this division play an essential role in diagnosis and prognostication of both cancers and non cancers.

RADIOLOGY

Reliable radiology services play an essential role in your ability to deliver the most accurate diagnosis. With us, you can be assured of the latest technology such as 3T MRI, ultrasound and MdCt, as well as testing supervised by a team of highly qualified and experienced Radiologists. this ensures that the results you see aren't just accurate but clinically relevant. We are committed to being your most reliable and responsive partner.

ULTRASOUND

We provide Ultrasound techniques to provide accurate pictures of the body's internal structures without using ionizing radiation.

X-RAY

We provide X-ray or radiography to get greater visibility of specific organs such as blood vessels and tissues.

Upcoming Tests

3T MRI

An MRI scanner is a large tube that contains powerful magnets. You lie inside the tube during the scan. An MRI scan can be used to examine almost any part of the body, including the:

- brain and spinal cord
- bones and joints
- breasts
- heart and blood vessels

CT SCAN

We provide multiple detectors computed tomography that helps pinpoint the location of abnormalities.

MAMMOGRAPHY

We provide advanced Mammography procedures to see the inside tissues of the breasts.

2D ECHO

We provide Echocardiography, a test that can produce live images of the heart with the help of sound waves.

TMT/PFT

We provide Treadmill Test (TMT) to find the stress on the heart. PFT - Pulmonary function tests (PFTs) to find out whether the lungs are working well.

BMD/DEXA

We provide Bone densitometry, or dual-energy x-ray absorptiometry or DEXA to help diagnose osteoporosis and evaluates the individual's risk for developing fractures.

OPG

We provide OPG tests that can portray the teeth both the upper and lower jaw on a single film.
